## USING THE FUEL ECONOMY GUIDE

The U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy (DOE) produce the *Fuel Economy Guide* to help car buyers choose the most fuel-efficient vehicle that meets their needs. EPA compiles the fuel economy data and DOE publishes them in print and on the web at [www.fueleconomy.gov](http://www.fueleconomy.gov) (see p. 2).

### FUEL ECONOMY ESTIMATES

Each vehicle in this guide has two fuel economy estimates.

**City** represents urban driving, in which a vehicle is started in the morning (after being parked all night) and driven in stop-and-go rush hour traffic.

**Highway** represents a mixture of rural and interstate highway driving in warmed-up vehicles, typical of longer trips in free-flowing traffic.

### WHY YOUR FUEL ECONOMY CAN VARY

A vehicle's fuel economy is not a constant or fixed number; it varies among vehicles of the same make and model, and it will vary over time for an individual vehicle. Many factors affect a vehicle's fuel economy:

**When, where, and how the vehicle is driven:** Frequent acceleration and braking necessary in stop-and-go traffic and on hilly terrain hurt fuel economy, and aggressive driving (hard accelerating and braking) reduces it even more. Cold weather can also reduce MPG since your engine doesn't run efficiently until it is warmed up.

**Vehicle maintenance:** A poorly tuned engine burns more fuel, so fuel economy will suffer if your engine is not in tune. Keeping tires at the correct pressure and changing the air filter on a regular basis can improve fuel economy. Also, new energy-saving motor oils can improve MPG.

**Inherent variations in vehicles:** Small variations in the way vehicles are manufactured and assembled can cause MPG variations among vehicles of the same make and model. Usually, differences are small, but a few drivers will see a marked deviation from the EPA estimates.

Refer to [www.fueleconomy.gov](http://www.fueleconomy.gov) for more detailed explanations and fuel economy tips.

### ANNUAL FUEL COST ESTIMATES

This guide provides annual fuel cost estimates for each vehicle. This estimate is based on the assumptions that you travel 15,000 miles per year (55% under city driving conditions and 45% under highway conditions) and that fuel costs \$1.55/gallon for regular unleaded gasoline and \$1.65/gallon for premium. Cost-per-gallon assumptions for vehicles that use other fuel types are discussed at the beginning of those vehicle sections.

Compare this vehicle to others by using the FREE FUEL ECONOMY GUIDE available in the dealer showroom.

<b>CITY MPG</b> 24		<b>HIGHWAY MPG</b> 31
Actual Mileage will vary with options, driving conditions, driving habits and vehicle's condition. Results reported to EPA indicate that the majority of vehicles with these estimates will achieve between 19 and 29 mpg in the city and between 25 and 37 mpg on the highway.	2003 GREEN CAR 2WD, 4 CYL, 2.0 LITER, MULTIPOINT FUEL INJECTION, 4-SPEED AUTO TRANS, CATALYST.	For Comparison Shopping All vehicles classified as COMPACT CARS have been issued mileage ratings ranging from 11 to 52 mpg city and 16 to 59 mpg highway.
<b>Estimated Annual Fuel Cost: \$845</b>		

See [www.fueleconomy.gov](http://www.fueleconomy.gov)

EPA miles-per-gallon (MPG) estimates are based on lab testing and are adjusted to reflect real-world driving conditions for an average U.S. motorist. Vehicles are tested in the same manner to allow fair comparisons. For answers to frequently asked questions about fuel economy estimates, visit [www.fueleconomy.gov/feg/info.shtml](http://www.fueleconomy.gov/feg/info.shtml).

## UNDERSTANDING THE GUIDE LISTINGS

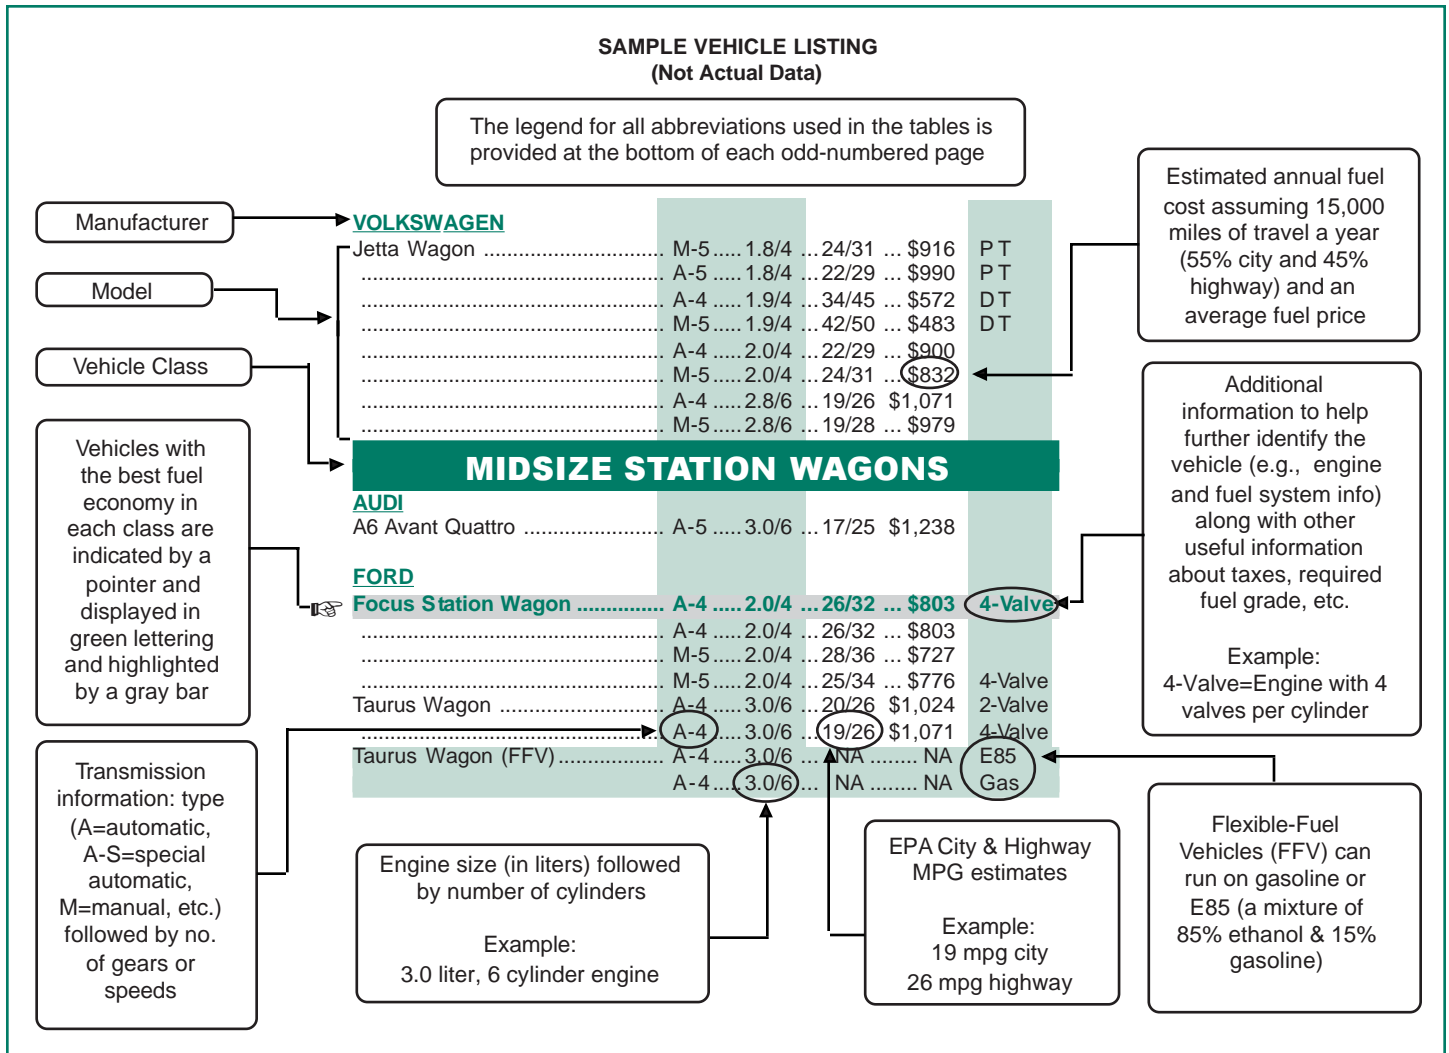

We hope you'll find the *Fuel Economy Guide* easy to use! Vehicles are first organized by fuel type and then grouped by class (see the table on page 2 for a listing of vehicle classes). Within each class, vehicles are listed alphabetically by manufacturer and model—vehicle models with different characteristics, including transmission type or engine size, are listed as different vehicles. Additional characteristics about the vehicle, such as valve or fuel system, may also be needed to distinguish between similar vehicles. This information is listed in the “Notes” column. Interior volume information is located in the index at the back of the Guide.

The diagram below explains the contents of a typical listing. The vehicle make and model are listed in the first column. Additional information on transmission type (e.g., automatic or manual) and the number of gears is listed in the second column, and information on the engine size (in liters) and the number of cylinders is listed in the third. This information is usually needed to correctly identify a specific configuration within a model type.

Column 4 shows EPA MPG estimates for city and highway driving. The vehicle with the best fuel economy in each vehicle class is indicated by a pointer to the left of the model name; the listing is displayed in bold lettering and is highlighted by a gray bar. Alternative fuel vehicles are highlighted by a green bar. Annual estimated fuel cost is listed in column 5 (see the inside front cover for an explanation of how this is estimated). The final column (“Notes”) contains additional information on engine and fuel system type, applicable taxes, and other useful information.

Vehicles with a “P” in the “Notes” column require premium-grade gasoline. Because premium is the most expensive grade of gasoline, these vehicles may have a higher annual fuel cost even though they have a slightly better fuel economy than other vehicles. A legend for all of the abbreviations is provided at the bottom of each odd-numbered page.

Additional information on interior passenger and cargo volumes is included in the Index beginning on page 20.

## WHY SOME VEHICLES ARE NOT LISTED

- ◆ Vans, pickup trucks, and sport utility vehicles (SUVs) weighing more than 8,500 pounds gross vehicle weight are classified as heavy-duty vehicles. Fuel economy regulations do not apply to these vehicles, so they are not tested and fuel economy labels are not posted in their windows.
- ◆ Some manufacturers may not submit a vehicle's fuel economy information to EPA in time to be included in the guide. However, you can usually find this information at [www.fueleconomy.gov](http://www.fueleconomy.gov), which is updated regularly.
- ◆ The availability of some vehicles is restricted.

## VEHICLE CLASSES USED IN THIS GUIDE

CARS (based on interior passenger and cargo volume)		TRUCKS (based on body style and load-bearing capacity)	
<b>TWO-SEATER CARS</b>		<b>PICKUP TRUCKS</b>	<b>Gross Vehicle Weight Rating</b>
<b>SEDANS</b>	<b>Passenger and Cargo Volume</b>	Small	Under 4,500 Pounds
Minicompact	Under 85 Cubic Feet	Standard	4,500 to 8,500 Pounds
Subcompact	85 to 99 Cubic Feet	<b>VANS</b>	Under 8,500 Pounds
Compact	100 to 109 Cubic Feet	Passenger	
Midsize	110 to 119 Cubic Feet	Cargo	
Large	120 or More Cubic Feet	<b>MINIVANS</b>	Under 8,500 Pounds
<b>STATION WAGONS</b>	<b>Passenger and Cargo Volume</b>	<b>SPORT UTILITY VEHICLES</b>	Under 8,500 Pounds
Small	Under 130 Cubic Feet	<b>SPECIAL PURPOSE VEHICLES</b>	Under 8,500 Pounds
Midsize	130 to 159 Cubic Feet		
Large	160 or More Cubic Feet		

## TAX INCENTIVES AND DISINCENTIVES

### TAX CREDITS AND DEDUCTIONS

If you purchase a qualifying electric or "clean-fuel" vehicle in 2003, you may be eligible for federal income tax incentives, such as tax credits and deductions. Clean fuel vehicles include gasoline-electric hybrids, compressed natural gas (CNG) vehicles, liquefied propane gas (LPG) vehicles, and others powered by alternative fuels. Visit [www.fueleconomy.gov](http://www.fueleconomy.gov) for more detailed information on current incentives and the most up-to-date news on tax incentives under consideration.

### GAS GUZZLER TAX

The Energy Tax Act of 1978 requires auto companies to pay a gas guzzler tax on the sale of passenger cars with exceptionally low fuel economy. Such vehicles are identified in this guide by the word "Tax." In the dealer showroom, the words "Gas Guzzler" and the amount of the tax are listed on the vehicle's fuel economy label. The tax does not apply to light trucks.

## WWW.FUELECONOMY.GOV

Learn more and do more on-line at [www.fueleconomy.gov](http://www.fueleconomy.gov)!

- ◆ Download and print additional copies of the *Fuel Economy Guide*.
- ◆ Search for specific vehicles by class, manufacturer, and MPG and compare up to three vehicles at a time, side-by-side.
- ◆ View MPG, emissions, and safety information for used vehicles dating back to 1985.
- ◆ Learn about tax incentives for hybrid-electric, electric and other alternative fuel vehicles.
- ◆ Read tips for improving the fuel economy of your current vehicle.
- ◆ Calculate your annual fuel cost.
- ◆ Learn what makes a gallon of gasoline cost what it does (e.g., refining, transportation, taxes, etc.).
- ◆ Learn about advanced technologies such as hybrid-electric and fuel cell vehicles.

## WHY CONSIDER FUEL ECONOMY?

### SAVE MONEY

**You could save \$300-\$500 in fuel costs each year by choosing the most fuel-efficient vehicle in a particular class.** This can add up to thousands of dollars over a vehicle's lifetime. Fuel-efficient models come in all shapes and sizes, so you need not sacrifice utility or size.

Each vehicle listing in the *Fuel Economy Guide* provides fuel cost information (described on the inside front cover). The fuel economy web site, [www.fueleconomy.gov](http://www.fueleconomy.gov), features an annual fuel cost calculator, which allows you to insert your local gasoline prices and consider your driving preference to achieve the most accurate fuel cost information for your vehicle.

### STRENGTHEN NATIONAL ENERGY SECURITY

**Buying a more fuel-efficient vehicle can help strengthen our national energy security by reducing our dependence on foreign oil.** Half of the oil used to produce the gasoline you put in your tank is imported. The United States uses about 20 million barrels of oil per day, two-thirds of which is used for transportation. Petroleum imports cost us about \$2 billion a week—that's money that could be used to fuel our own economy.

### PROTECT THE ENVIRONMENT

Burning fossil fuels such as gasoline or diesel adds greenhouse gases, including carbon dioxide, to the earth's atmosphere. Greenhouse gases trap heat and thus warm the earth because they prevent a significant proportion of infrared radiation from escaping into space.

Vehicles with lower fuel economy burn more fuel, creating more carbon dioxide. Every gallon of gasoline your vehicle burns puts 20 pounds of carbon dioxide into the atmosphere. You can reduce your contribution to global warming by choosing a vehicle with higher fuel economy.

**By choosing a vehicle that achieves 25 miles per gallon rather than 20 miles per gallon, you can prevent the release of about 15 tons of greenhouse gas pollution over the lifetime of your vehicle.**

## TIPS FOR IMPROVING FUEL ECONOMY

### KEEP YOUR CAR IN SHAPE

- ◆ Fixing a car that is noticeably out of tune can improve gas mileage by about 4%—repairing a faulty oxygen sensor can improve fuel economy by as much as 40%!
- ◆ Replacing a clogged air filter can improve gas mileage by as much as 10% (and protect your engine).
- ◆ Keeping your tires inflated to the recommended pressure and using the recommended grade of motor oil can save as much as 3–5¢/gallon. The manufacturer's recommended tire pressure can be found on the tire information placard and/or vehicle certification label located on the vehicle door edge, doorpost, or glove-box door, or inside the trunk lid.

### PLAN AND COMBINE TRIPS

- ◆ A warmed-up engine is more fuel-efficient than a cold one. Many short trips taken from a cold start can use twice as much fuel as one multipurpose trip covering the same distance when the engine is warmed up and efficient. Trip planning not only saves fuel, but also reduces wear and tear on your car.

### DRIVE MORE EFFICIENTLY

- ◆ Aggressive driving (speeding and rapid acceleration and braking) can lower your gas mileage by as much as 33% at highway speeds and 5% around town (costing you as much as 49¢/gallon!).
- ◆ Observe the speed limit—each 5 miles per hour (mph) you drive over 60 mph is like paying an additional 10¢/gallon.
- ◆ Avoid idling—idling gets 0 miles per gallon.

For more tips and for more information about gasoline pricing, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).

## MODEL YEAR 2003 FUEL ECONOMY LEADERS

Listed below are vehicles with the highest fuel economy in the most popular classes, including vehicles with both automatic and manual transmissions. Please note that many vehicle models come in a range of engine sizes and trim lines, resulting in different fuel economy values.

### TWO-SEATER CARS

Honda Insight (hybrid electric) ..... man trans ..... 61/68  
 ..... auto trans ..... 57/56

### MINICOMPACT CARS

BMW Mini Cooper ..... man trans ..... 28/37  
 ..... auto trans ..... 25/32

### SUBCOMPACT CARS

Volkswagen New Beetle (diesel) ..... man trans ..... 42/49  
 ..... auto trans ..... 34/44

### COMPACT CARS

Toyota Prius (hybrid electric) ..... auto trans ..... 52/45  
 Honda Civic (hybrid) ..... man trans ..... 46/51

### MIDSIZE CARS

Honda Accord ..... man trans ..... 26/34  
 ..... auto trans ..... 24/33

### LARGE CARS

Chevrolet Impala ..... auto trans ..... 21/32

### SMALL STATION WAGONS

Volkswagen Jetta Wagon (diesel) ..... man trans ..... 42/50  
 ..... auto trans ..... 34/45

### MIDSIZE STATION WAGONS

Ford Focus Station Wagon ..... man trans ..... 27/36  
 ..... auto trans ..... 27/33

### CARGO VANS

Chevrolet Astro 2WD ..... auto trans ..... 17/23  
 GMC Safari 2WD ..... auto trans ..... 17/23

### MINIVANS

Chrysler Voyager/Town & Country ..... auto trans ..... 21/27  
 Dodge Caravan ..... auto trans ..... 21/27

### PASSENGER VANS

Chevrolet Astro 2WD ..... auto trans ..... 16/20  
 GMC Safari 2WD ..... auto trans ..... 16/20

### SUV

Toyota Rav4 2WD ..... man trans ..... 25/31  
 ..... auto trans ..... 24/29

### SMALL PICKUP TRUCKS

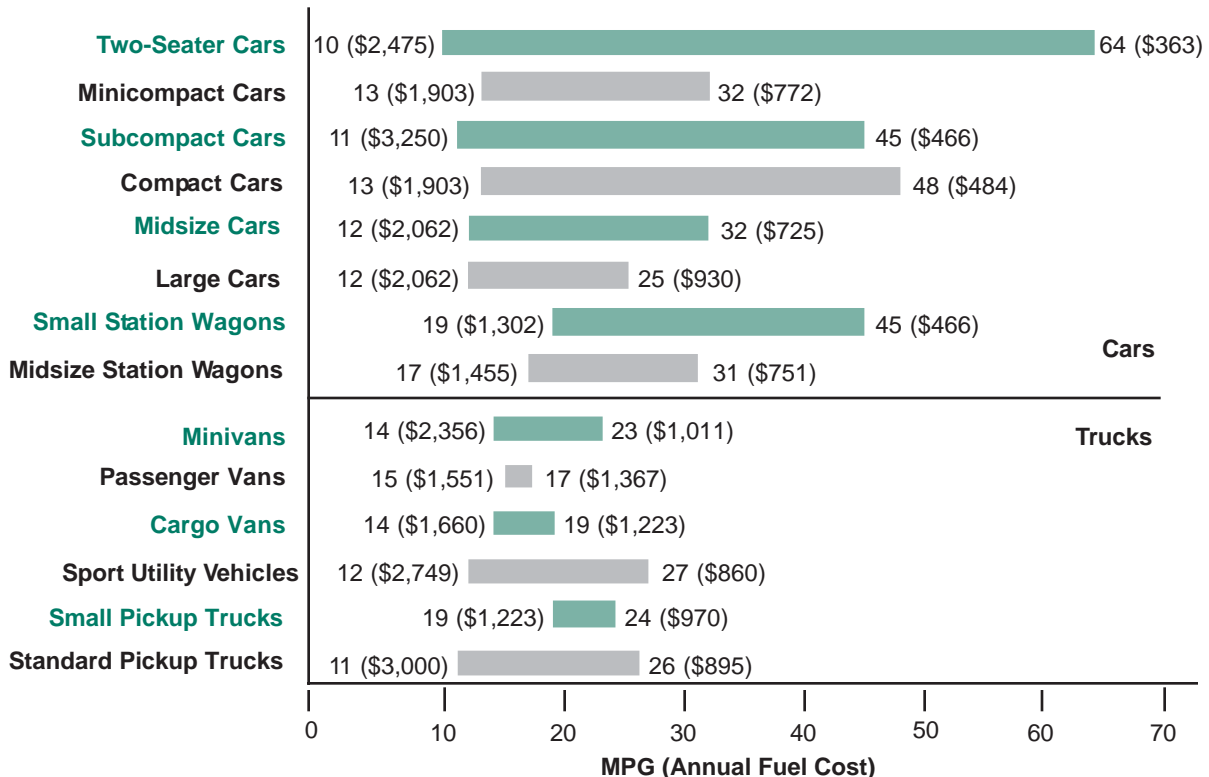

Chevrolet S10 Pickup 2WD ..... man trans ..... 22/28  
 ..... auto trans ..... 19/25  
 GMC Sonoma 2WD ..... man trans ..... 22/28  
 ..... auto trans ..... 19/25

### STANDARD PICKUP TRUCKS

Ford Ranger Pickup 2WD ..... man trans ..... 24/29  
 ..... auto trans ..... 23/26  
 Mazda B2300 2WD ..... man trans ..... 24/29  
 ..... auto trans ..... 23/26

## FUEL ECONOMY & ANNUAL FUEL COST RANGES FOR VEHICLE CLASSES

The graph below provides the fuel economy and annual fuel cost ranges for the vehicles in each vehicle class so that you can see where a given vehicle's fuel economy and cost fall within its class. Combined city and highway MPG estimates are used; these assume you will drive 55% in the city and 45% on the highway.

## 2003 MODEL YEAR VEHICLES

This section contains the fuel economy values for 2003 model year vehicles. Additional information for alternative fuel vehicles can also be found on pages 16-19. The most fuel efficient automatic and manual vehicles per class are listed in green boldface type and highlighted by a gray bar. The most efficient vehicle in each class is marked with a .

	Trans Type / Speeds	Eng Size / Cylinders	MPG City / Hwy	Annual Fuel Cost	Notes / Abbreviations

## COMPRESSED NATURAL GAS VEHICLES

This section supplies the driving range and fuel economy values for vehicles designed to be operated on compressed natural gas (CNG). For bi-fuel vehicles, the values for both gasoline and CNG are shown. Bi-fuel vehicles are designed to be operated on either of two fuels, in separate tanks, and can switch between the two.

CNG fuel is normally dispensed in “equivalent gallons,” where one equivalent gallon is equal to 121.5 cubic feet of CNG. Therefore, the fuel economy values are shown in miles per gallon-equivalent. Annual fuel cost estimates are based on an average fuel price of \$1.15 per gallon of CNG and \$1.55 per gallon of gasoline.

The driving range is shown in miles and represents the distance the vehicle can travel on a full tank (or tanks) of fuel during combined city and highway driving (55% city and 45% highway).

## LIQUEFIED PETROLEUM GAS (PROPANE) VEHICLES

This section contains the estimated city and highway fuel economy values and the driving range for passenger cars and light trucks designed to be operated on liquefied petroleum gas (LPG), which is commonly known as propane. For bi-fuel vehicles, both the gasoline and the LPG mpg values and driving ranges are listed, if available. Bi-fuel LPG vehicles have two fuel tanks. Annual fuel cost estimates are based on an average fuel price of \$1.65 per gallon of LPG and \$1.55 per gallon of gasoline.

## DIESEL VEHICLES

This section contains fuel economy values for diesel-fueled vehicles. Diesel fuel contains approximately 10% more energy per gallon than gasoline. In addition, diesel engines have higher compression ratios, run “lean,” and are unthrottled, giving them a substantial fuel economy advantage over gasoline engines. Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and a diesel fuel cost of \$1.40 per gallon.

## ELECTRIC VEHICLES

This section contains the driving range and fuel economy values for fully electric-powered passenger vehicles. The fuel economy values for electric vehicles are shown in kilowatt-hours per 100 miles, instead of miles per gallon. **A lower number of kilowatt-hours means a more efficient vehicle.**

The driving range is shown in miles and represents the maximum distance the vehicle can travel under optimum conditions before the battery needs recharging. The actual energy consumption and range of the vehicle will vary depending on driving conditions, battery condition, and accessory usage, and is strongly affected by outside temperature and the use of heating and air conditioning. Fuel costs will vary considerably because of the differences in electricity costs across the United States.

You can calculate the fuel cost (in dollars) of driving your electric vehicle for a year by multiplying the energy consumption for the vehicle as listed below (in kilowatt-hours/100 miles) by your local electricity rate (in dollars per kilowatt-hour), multiplying that by the annual miles the vehicle will be driven, and dividing by 100.

Check with your dealer for availability, as some electric vehicles may be offered for sale or lease only in certain parts of the country.

## ETHANOL FLEXIBLE-FUEL VEHICLES

This section contains the driving range and fuel economy values for ethanol flexible-fuel passenger cars and light trucks. Ethanol flexible-fuel vehicles are designed to operate on gasoline, E85 (a mixture of 85% ethanol and 15% gasoline), or any mixture of the two fuels. Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and an average fuel cost of \$2.20 per gallon of E85 and \$1.55 per gallon of gasoline.

The driving range and fuel economy values are shown for both gasoline and E85. When operating your FFV on mixtures of gasoline and E85, such as when alternating between using these fuels, your driving range and fuel economy values will be somewhere between those listed for the two fuels, depending on the actual percentage of gasoline and E85 in the tank.

## FUEL CELL VEHICLES

### ADVANCED TRANSPORTATION TECHNOLOGY

### THE CHALLENGES AHEAD

Although fuel cell vehicles (FCVs) are not expected to reach the mass market before 2010, a limited number will be available for sale or lease to demonstration fleets in 2003-4. Vehicle availability will be restricted to drivers in certain parts of the country with a readily accessible hydrogen supply. The vehicle listed below is the first FCV to be emission-certified by EPA.

Much work remains before FCVs can be mass-marketed and sold at local dealerships. Significant research and development is required to reduce costs and improve performance in areas such as driving range, cold-weather operation, and durability. A new refueling infrastructure will be required to make hydrogen fuel widely available to consumers.

FCVs represent a radical departure from conventional vehicles with internal combustion engines. They use emerging technology with the potential to substantially reduce harmful emissions, as well as energy use and our dependence on foreign oil. Like battery-electric vehicles, FCVs are propelled by electric motors. The important difference, however, is that rather than storing electricity by recharging batteries, fuel cells produce electricity directly from the chemical energy of hydrogen fuel.

Automakers, fuel cell developers, component suppliers, government agencies, and others are working hard to accelerate the introduction of FCVs. In fact, partnerships such as the DOE-led FreedomCAR Initiative and the California Fuel Cell Partnership have been formed to encourage private companies and government agencies to work together to prove this technology's viability and move FCVs toward widespread commercialization. For more information about FCVs and links to fuel cell web sites, please visit [www.fueleconomy.gov/feg/fuelcell.shtml](http://www.fueleconomy.gov/feg/fuelcell.shtml).

FCVs are more efficient than vehicles with internal combustion engines, and the only by-product of a hydrogen fuel cell is water. Like hybrid-electric and battery-electric vehicles, FCVs may also incorporate other advanced automotive technologies to increase efficiency.

FCVs can store hydrogen on-board or can be equipped to produce hydrogen on-board from a liquid fuel like gasoline or alcohol; if hydrogen is stored on-board.

					NA**

\* Kilowatts of direct current

\*\* The fuel economy values and driving range were not available at press time. See [www.fueleconomy.gov](http://www.fueleconomy.gov) for updated information.

Availability: A limited number of 2003 Honda FCX fuel cell vehicles (approximately 10 vehicles) are expected to be available for lease to certain customers in the southern California area.

# SAMPLE FUEL ECONOMY LABEL

(Attached to New Vehicle Window)

Use these two estimates to compare to other models.

Compare this vehicle to others by using the **FREE FUEL ECONOMY GUIDE** available in the dealer showroom.

This is the average estimate for city driving.

This is the average estimate for highway driving.

These numbers represent a range of fuel economy that most drivers achieve with this particular model.

These numbers represent the range of fuel economy for other models of this size class.

This fuel cost is based on 15,000 mi/yr at \$1.55 per gallon for regular unleaded and \$1.65 for premium.

**CITY MPG**  
**24**

**Fuel Economy Information**

**HIGHWAY MPG**  
**31**

**Actual Mileage** will vary with options, driving conditions, driving habits and vehicle's condition. Results reported to EPA indicate that the majority of vehicles with these estimates will achieve between  
19 and 29 mpg in the city  
and between  
25 and 37 mpg on the highway.

**2003 GREEN CAR 2WD, 4 CYL, 2.0 LITER, MULTIPOINT FUEL INJECTION, 4-SPEED AUTO TRANS, CATALYST.**

**Estimated Annual Fuel Cost:**  
**\$845**

**For Comparison Shopping**  
All vehicles classified as COMPACT CARS have been issued mileage ratings ranging from  
11 to 52 mpg city  
and  
16 to 59 mpg highway.

See [www.fueleconomy.gov](http://www.fueleconomy.gov)

Check the fuel economy label on the vehicle at the dealer showroom for its specific fuel economy (mpg) ratings. The ratings may vary slightly from the values in this guide because of engine and fuel system differences not listed here.
